

Safety

With our own well equipped workshops we are ideally placed to ensure that our vehicles are up to the job. With our own well equipped base, we have recently made a significant investment in upgrading our workshop facilities. This investment includes an inspection pit long enough to take a full length coach. In addition have every piece of equipment needed to maintain our coaches to the highest standard. We have a full well equipped tyre bay, through our sister company VIP Car and Commercial Limited. We are able to inspect our tyres and rectify any problems without delay.

We operate a modern fleet of coaches rigorously maintained by our expert team to ensure maximum performance and efficiency. Coaches receive daily checks and are thoroughly inspected through a formal procedure at least every 6 weeks.

Our drivers have regular training in driving practice and health and safety. And we are fully compliant with all Department of Transport and EU regulations regarding drivers' hours.

Drivers are CRB checked and receive training to approved NVQ levels.
